Project 1

Project title- Relyinks

Domain: - E-commerce

Project description-

This platform helps you to purchase the products, services online by selecting product on website. The proposed agreements require creation of market place via internet connection for purchase, delivery or online sale of products. Consumers can select various products and various brands depending upon categories, there are multiple delivery options are available.

Roles And Responsibilities:

- Discuss and clarify requirements provided by Business Analyst.
- Design UI with web technologies provided by UX team.
- Consulting with the product owner on requirements.
- Extensive usage of Bootstrap for layout as responsive design.
- Created reusable templates and styles sheets based on UI standards and guidelines.
- Extensively used Debugging TypeScript Using Chrome Developer Toolbar
- Designed component's view using Bootstrap and SASS for application layout.
- Implemented and handled two different angular libraries.
- Used custom elements concept for components loaded by inner html.

Project 2

Project Name: Kayak

Domain: Travelling

Description:

Kayak is a travel search engine. And since it's a search engine, it's a great place to start.

The site compares prices from many different websites all in a single spot so you can easily see where the cheapest options are. Most of the time, you'll end up clicking through to a different site to complete your booking. Kayak Hacker Fares are a great way to save money on your flight. These are itineraries created by bundling 2 one-way tickets (usually on different airlines) instead of a round-trip on 1 airline. These can be pretty good deals, and something that doesn't always appear in search results of other websites.

Project description-

- Discuss and clarify requirements provided by the Product Manager.
- Involved in requirement gathering sessions and developing web applications using Agile Methodology
- Design the Solution with Web Services and Java technologies.
- Expose web services implemented using Restful web services.
- Designed Custom Directives using Angular.
- Used Angular Directives like ngModel, ngFor, ngClass, ngIf, hidden, etc.
- Developed the project's web page as Single Page Application (SPA) by using Angular.
- Worked within a lean agile environment and continuous delivery, did pair programming with Junior/Senior developers.

DECLARATION

I hereby declare that the above-mentioned information is correct up to my knowledge and I bear the responsibility for the correctness of the above-mentioned particulars
