- ❖ **Operating System:** Windows
- ❖ **Debugging Tools:** Google Chrome Web Debugger Development Tools
- ❖ **Version Controls:** Git
- ❖ **IDE/Editors:** Visual Studio Code, VS Code, Sublime Text, Notepad++

PROJECTS

Project 1

Project title- Relyinks

Domain: - E-commerce

Project description-

During my time at Infosys, I was part of Relyinks Application from May 2023 to October 2023. This platform helps you to purchase the products, services online by selecting product on website. The proposed agreements require creation of market place via internet connection for purchase, delivery or online sale of products. Consumers can select various products and various brands depending upon categories, there are multiple delivery options are available.

Roles And Responsibilities:

- Discuss and clarify requirements provided by Business Analyst.
- Design UI with web technologies provided by UX team.
- Extensive usage of Bootstrap for layout as responsive design.
- Created reusable templates and styles sheets based on UI standards and guidelines.
- Extensively used Debugging TypeScript Using Chrome Developer Toolbar
- Designed component's view using Bootstrap for application layout.

Project 2

Project title- Kayak

Domain: - Travelling

Kayak is a travel search engine. And since it's a search engine, it's a great place to start.

The site compares prices from many different websites all in a single spot so you can easily see where the cheapest options are. Most of the time, you'll end up clicking through to a different site to complete your booking. Kayak Hacker Fares are a great way to save money on your flight. These can be pretty good deals, and something that doesn't always appear in search results of other websites.

Project description-

- Discuss and clarify requirements provided by the Product Manager.
- Design the Solution with Web Services.
- Used Angular Directives like ngModel, ngFor, ngClass, ngIf, hidden, etc.
- Developed the project's web page as Single Page Application (SPA) by using Angular.
